

How to recognize AI ^{fraud} stake oil :-

Date:- 03-09-24

→ chilling effects :- enacting such a policies which promotes to the people by operating terror / fear in

• people are learning to work around these bogus systems and sharing horror stories on social media.

• Genuine Progress in AI :-

- face recognition
- speech to text (perception level)
- Deepfakes
- content identification

• AI far from perfect, but improving :-

- Hate speech detection
- Content recommendation (Automating judgment)
- Spam detection

• Fundamentally dubious

- Predictive Policing
- Predicting terrorist risk
- Predicting at-risk kids
- All job performance (Predicting social outcomes)

Why philosophy?

- ontology :- what is reality?
- epistemology :- try to figure out what is knowledge
- ethics :- moral philosophy

⇒ Ethics :- ethics = morality
what is ethics? ⇒ meta ethics
what is ethical thing to do? ⇒ Normative ethics
Using ethics ⇒ Applied ethics

* Normative ethics :-

1) Virtue ethics :- does a person have good qualities
- does not concern action

2) Deontologic ethics :- fundamental look at the action
- no look at the circumstances
- categorical imperative
- veil of ignorance

3) Consequentialism :- what the consequence for society.
- Utilitarian
- State Consensualism
- Contextual (state similar to shopkeeper)

d] Pragmatism :- (American) get everybody as a representative on a board & get to a common conclusion

* Applied Ethics :-

- Policy making
- Bioethics and machine ethics
- AI control problem :- AI would not do that you don't want it to do.
- effective altruism :- & longtermism?
- Is political-economy truly amoral?
