Global Expansion of AI Surveillance

↳ The spread of AI surveillance tech. → white paper, with contributions from organizations focused on this area

Public policy → A significant portion of funding for India's AI related from entities such as Bill & Melinda Gates Foundation (BGF)

AI Surveillance

Technology → Technological Advancements using AI for surveillance purposes have been notable. Facial recognition systems and smart policing are example of this

- Facial recognition technology (FRT) is a prominent AI Surveillance tool
- By 2019, over 75 countries had already implemented AI Surveillance technologies.
- Smart cities & facial recognition systems are central to this advancement

→ China stands out as key player in AI surveillance tech. with companies such as Huawei, Hikvision, Dahua, and ZTE providing these solutions to 63 countries, 36 of which are part of Belt & Road initiative

→ Non-Chinese surveillance providers

↳ NEC JAPAN

→ Some countries receive loans to facilitate the use of AI Surveillance for governance.

→ In USA → IBM, Palantir (for AI Surveillance)

→

Democratic Use of AI Surveillance

- Liberal democracies like France, Germany, Israel, Japan utilize AI Surveillance System
- The use of tech. doesn't inherently indicate misuse by democratic govt.
