Human Rights

- Unconditional rights for all humans.
- These are universal.
- Eg. Right to life (dignified), Right to Belief (All don't have)
- consistent in theory. Not philosophical, collectively defined of United Nations after WW-II.
- They are actionable and could be enforced.
- Problematic concept →

    What must be on list and what not list?

    why not Right to Pizza?, who defined it?

- Right to free news → India pointed that american news agencies dominated.

    Negative rights → Right to free speech. No extra thing is given.
      Positive right → Right to food. [Government will give]

    How is right to free speech universal? [Rich can broadcast. Sir can't do with yelling on Road]

    Fight of USA and USSR → on Polio research.

- If your criterion is bare minimum, you ignore that reality it is money dependent.

    Structural voilence → human right do not take into account

    तुम्हारा होना ही श्राप है।

- History of human rights come from Religion.
    ↳ Gritisism that it should come from politics.
      "Law" → society
      "Right" → God

Far History of Rights

Magna Carta → Laws were applied to Government for the first
time. [If British Monarch does something, it could be wrong]
"Government is not God"

→ People started to question religion. They ask proof to king, why
he is superior. The era c/a Enlightenment.

Right against Refulment → Every one ~~citizen d~~ is a part of country.
This Right is violated on daily basic.

• Human rights are concrete mechanisms for AI governance.
• You cannot deploy a AI System which ~~vio~~ violates Human
Rights.

Human Right Criticism → Positive Rights are not guaranteed.
They do not look on structural voilence.

• They are applicable to AI.
what will give Right to Job?
